DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None
☐ Minor
☒ Substantial
☐ Destroyed
☐ Unknown

Aircraft Fire

- ☒ None
☐ In-Flight
☐ On-Ground
☐ Both Ground and In-Flight
☐ Fire at Unknown Time
☐ Unknown

Aircraft Explosion

- ☒ None
☐ In-Flight
☐ On-Ground
☐ Both Ground and In-Flight
☐ Fire at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Aircraft props damaged, nose wheel, front cowling. Aircraft was inverted. Wings possibly damaged as well.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon rotation from runway 15L pilot perceived a louder than normal engine noise. Checked both pilot and passenger windows to ensure closed and locked. Intended to pull throttle back slightly to diagnose the noise. Intent was to listen for a change in noise while preventing any further damage to the engine (should it have had high RPMs) and potentially ask for a traffic pattern to continue diagnosing. However, instead of pulling the throttle the fuel mixture was inadvertently pulled causing the engine to quit. Pilot attempted to restart twice without success. With a tree line approaching at an altitude of 300 ft AGL, the decision was made to perform a right turn back to the field at the end of the runway. Aircraft was flown at approximately 70 kts until flare where it touched down at approximately 60 kts. During the roll out the front nose gear contacted a large rut forcing the airplane's nose to roll and continuing until the plane was inverted in the field.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Call out any lever pilot is intending to move as it is touched and take a quick pause to verify prior to moving.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
 (If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
