☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Broken windscreen. Damage to composite area above windscreen. Interior headliner ripped and covered with remains of bird.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

N41CA took off at 9:08am on 3/27, VFR from Gwinnett County Airport (KLZU), bound for Titusville (KTIX). Joined up with the Florida coast just south of St Augustine and contacted Daytona ATC approach to traverse their airspace. Approach acknowledged position and altitude and a discreet squawk code was given. ATC instructed a descent to 1000 feet for departing traffic prior to N41CA passing by the airport. Just as we arrived at the 1000 ft altitude, we saw three or four birds. I saw them less than a second before one struck the wind screen, approximately 1.5 miles North East from Daytona's 25R runway. The bird hit the aircraft towards the top of the windscreen, shattering it on the pilot's side. I called mayday and ATC cleared a landing on 25R. Once landed, ATC gave progressive taxi instructions to Yelvington Jet Aviation. Airport ops and airport fire met the plane, and an ambulance was called. Injuries to the pilot were mild: 1.5-inch laceration to the forehead and various smaller cuts and bruises on the face, arms, and leg. Medics bandaged the forehead and advised no stitches needed, in their opinion. Airport ops took blood samples for the bird strike report and filed report.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

If you can help it, don't hit birds.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
