☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Tail section including rudder and elevator fully broken off/separated from aircraft, broken wing tip, loss of engine oil/engine damage which resulted in failure during flight, broken ailerons/flaps. Likely electronics damage due to water ingress. Aircraft is in hangar storage at Fernando Luis Ribas Dominicci (TJIG) airport. Held on the North Side/Modern Aviation facilities.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Preflight inspection resulted in all systems normal. Enroute to TJIG at 1,000 feet, approaching the Levittown Water Tank where progress/waypoint notification was requested by TJIG Tower when Engine and Land Aircraft lights lit up on the annunciator panel. Checked Garmin digital engine information and read "Oil PSI: 1" flashing a warning. Then looked at the analogue oil temperature gauge and the indicator/arrow was at the bottom, showing no reading of oil temperature. Engine immediately began to lose power. I notified TJIG Tower that I had lost oil pressure and most of my power. The Engine seized up seconds after that. I began emergency procedures to glide the aircraft towards the bay near Puntas Salinas. Landed in rough seas.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Depending on investigation results, the cause of the mechanical engine failure should be rectified.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)**Was there Mechanical Malfunction/Failure?** ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Engine: Rotax 916iS, Serial Number: 10005526, complete loss of oil pressure, followed by engine failure. Visible oil leak/discharge on right side of engine cowling.
