Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Plane flipped over in grass, per pilot statement below. Damage to runway sign from impact,

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was coming in to land on runway 22; as I flared out to land, I flared out slightly higher than normal and my plane bounced on landing. I proceeded to apply full power but I put it in too fast. The plane P Factor then rotated the plane to the left and I did not properly control the rudder. The plane immediately veered left, left the runway, hit a runway sign and then flipped over. It was completely pilot error. I am honestly embarrassed and ashamed that I mismanaged the landing; having over 920 landings and approaching 100 landings in the Maule M9, I should never have let this happen.

Conclusion: I flared too high, I did not land with enough power to manage the landing, I then applied the power too quickly, I did not have proper directional control of the rudder. In conclusion, it was 100% PILOT ERROR.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
