

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: Greenwood State: SC

 ZIP: 29646 Country: USA

 Latitude: 34 07' 50.86" N Longitude: 82 09' 46.19" W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 04/20/2026 Local Time: 02:30
 mm/dd/yyyy HH:MM

 Time Zone: EDT

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N27CU

 Manufacturer: Alexander Schleicher

 Model: ASG27-18

 Serial Number: 29058

 Year of Manufacture: 2,010

 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

- ☐
- IFR-Equipped and Certified
-
- ☐
- Commercial Space Flight
-
- ☐
- Unmanned Aircraft

 Maximum Gross Weight: 1,322 lbs.

 Weight at Time of Accident/Incident: 910 lbs.

 Number of Seats: 1 Flight Crew Seats: _____

Cabin Crew Seats: _____ Passenger Seats: _____

Number of Engines: _____

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was participating in a regional glider competition at Perry International Airport. About 60 pilots were flying. My class of 20 pilots was assigned a task to fly from a start point near Perry to an area around Abbeville and then Greenwood, Barwell and back to Perry. The weather was post frontal and there were high winds aloft. Tows for my class of 18 meter gliders began about 12:30 p.m. There were no cumulus clouds to mark lift but there was chance for some later in the day. I found it difficult to find thermals but when I did I was able to get to 7,000 feet above ground. This part of South Carolina is fairly flat country. Perry is at 4318 feet. Abbeville is at 550 feet. 7,000 is considered quite high and allows for long glides without climbing. I went on course about 1:15 pm and proceeded NW toward Abbeville. I stopped briefly twice to climb back up to 7,000. The next climb was hard to find and I only reached 4,500. This is still considered a comfortably high altitude. Many races conducted entirely at lower heights. Whisps of clouds started to appear on course and I was encouraged. But I hswas unable to contact lift under them. Nevertheless I chased after the best looking ones. With more experience in these conditions with higher winds aloft over the thermal layer I might have realized clearly that the clouds were not marking lift at all, just turbulence. I eventually found another slow climb back to 4,500. My glide computer showed that I had enough altitude to make Abbville Airport with a safety margin. So I set off toward Abbeville, which was about 20 miles away. I immediately ran into strong sink and it was clear early on that I couldn't get that far. I began to divert toward the only fields I could see, ahead and to the right. I would normally look for farm fields and dirt, but there were none in this area. I made one pass over the small grassy fields, and continued to look for lift and better landing opportunity toward Greenwood. I came back to one of the fields I had picked out. Made a pattern and landed. The field was too short and there was a swale I haded spotted from the air. The left wing caught, the glider spun around and the tail boom slammed into the far side of the swale and broke.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I made a safety presentation to the glider racers the next day. I talked about some old lessons, which boil down to stop racing and land the glider. I have been racing cross country for more than 30 years and developed some complacency. I always believe I will find a climb and get away from a landout. This time, conditions wouldn't allow it. Awareness of what could happen in those conditions would have led to flying in an area with better landing options.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
