Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

The left wing leading edge dented about 1/3 in from the tip.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight was an experience ride. It was purchased for [REDACTED] by his friend [REDACTED] is a long time power pilot active in the local Richmond area. [REDACTED] had some years ago been a member of the Merlin Soaring club. [REDACTED] is also a long time amateur photographer and took many pictures of the flight prep (glider pre flight) and at the glider launch site. He also "ran the wing" for the flight.

Prior to launch I briefed [REDACTED] regarding my intended landing. I would land to the north on runway 32, but since this was the only flight for the LARK, I would roll off onto the south taxiway ending in front of the main hanger. We often do this when a glider is used once and then returned to the hanger. We agreed that he would take the gator tug we used to bring the glider to the launch site and return to the main hanger at the center of the airport.

The launch and flight went normally and because the lift was not good, we returned to the pattern in about 15 minutes. I announced my left pattern intention and proceeded to fly a normal downwind, base and final. Again, as is our normal procedure, I touched down about 1/4 down the runway and slowed as the glider rolled left onto the taxiway. For just a second, I saw [REDACTED] to the left taking pictures. A second later, I felt a thump and the glider turned 90 degrees to the left before coming to a stop.

I opened the canopy and jumped from the backseat, to find [REDACTED] in the fetal position on the ground. I yelled for the tow pilot to call 911 and [REDACTED] and I then did all we could to help [REDACTED] until the police and paramedics arrived.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
