Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight was an instructional flight intent to go over soft field takeoff and landing. CFI stated: After getting takeoff clearance entered the runway with the student holding back pressure on the yoke to complete a soft field takeoff. It seemed like he was forcing the plane off the ground into ground effect and plane was taking longer to get into ground effect. cfi stated that she heard stall horn once student pulled back on yoke she told him "don't force it, don't force it". Student pitched down and then immediately pitched up aggressively causing the plane to balloon. At which time cfi attempted to get control but student's hands were frozen on the controls and he was holding full aft yoke. The plane and stalled and rolled left they hit the ground nose first and then rolled upside down.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
