Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My passenger and I departed runway 01 at South Albany Airport (5B0) at approximately 11:22 EST on May 21, 2026. We headed east for a direct flight to KAFN with the purpose of having lunch at Kimball Farm, which is walkable from the airport. We flew in route at 7,500 ft (if I remember correctly). While approaching KAFN I tuned to KAFN's AWOS for an update on their local information, which indicated nothing out of the ordinary or of concern. We entered a left downwind for runway 34 at a pattern altitude of 2040'. When landing on runway 34 the aircraft was suddenly pushed left just prior to touchdown. I believe the main gear did touchdown off the runway but not the nose gear, I immediately applied full power for a go-around. The aircraft started climbing very smoothly but after a few seconds I started feeling a heavy vibration/flapping which appeared to be coming from under the aircraft at which point I was losing lift and falling to the ground. We impacted the ground and nosed over, being trapped upside down. I believe it was the airport owner who first arrived and was able to call emergency services. This was my fourth time flying into Jaffrey for the purpose of having lunch at Kimball Farm, so I am familiar with the area.
