Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to the aircraft appears to be limited to the propeller, engine (tear-down inspection needed), several belly skins and antennas.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft departed on an IFR flight plan from Knoxville, TN (KTVS) on 5/18/2026 at 11:22 AM EDT. The weather conditions were VFR for the duration of the flight and there was a slight tailwind. At about 12:32 EDT, the IFR flight plan was canceled as the destination (KSVH) was in sight. The aircraft continued to decent to pattern altitude and announced to Statesville traffic that the aircraft was several miles to the west and would enter a straight-in for the downwind leg of runway 28. As the aircraft got closer to KSVH this announcement was repeated several times using the aircraft's registration and approximate distance from the airport.

Prior to entering the downwind leg, an aircraft at KSVH announced they were "on the roll" from runway 28 and visual contact was made with the departing traffic. The departing traffic then made a left turn (crosswind) in front of the arriving aircraft but about 500 feet below the arriving aircraft. The PIC announced the the departing traffic was observed and that N177BT would follow the traffic on downwind. Another individual inside the aircraft (believed to be the instructor) apologized for cutting off the arriving aircraft and it appeared that neither occupant in the departing aircraft either heard or saw the arriving aircraft.

While on the downwind leg and reaching the end of runway 28 (preparing to turn to the base leg), the other aircraft continued to fly straight ahead. An inquiry was made by N177BT regarding the other aircraft's intentions and the reply was that they would turn on their base leg further out - which they did.

The PIC of N177BT became more focused and distracted by the unusual activities of the other aircraft and neglected to perform a GUMPS check on the final approach to runway 28. The propeller and aircraft made contact with the runway about 12:38 PM EDT. The airport was closed for about 30 minutes while the aircraft was lifted and removed from the runway.

Once the aircraft was lifted, the gear extended normally and the aircraft was relocated to a hangar on the field at Statesville.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The PIC of N177BT should have been more focused on running a pre-landing checklist prior to entering the downwind leg and validating that all items had been addressed before turning on the final leg.

The pre-landing checklist will be incorporated into the process for all landings going forward.
