Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

RH WING WOODEN BOW, WINGTIP LIGHT, TWO SPARS, FRONT AND REAR, BENT BEYOND REPAIR, WHOLE WING HAS TO BE REPLACED.
NO DAMAGE TO OTHER PROPERTY.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday, June 5, 2026 at 11AM at Carroll County Regional Airport, I tried to fly Piper Colt N5081Z from Runway 34. Before this flight I did, in another two days, two test flights of this aircraft, one flight from Runway 16 and second flight from Runway 34. There were no problems with controls of this aircraft. On July 5, 2026 during take-off from Runway 34, after I rotated aircraft in speed about 60 MPH, aircraft suddenly and abruptly turned to the left and ran out of Runway 34.

I cut immediately power and tried navigate moving aircraft to open field. Unfortunately on left side of Runway 34 is solid terrain wall about 8 ft high and I hit this wall by my right wing tip. I stopped engine, checked damages of right wing and decided to taxi damaged aircraft to tie-down position of airport. Nothing, except right wing of aircraft, was damaged and I had no personal injury. Also no damages to airport property.

Next day, Saturday June 6, 2026 I moved damaged aircraft to hangar # 65 for detailed inspection. No another damages, except RH wing, were found. RH wing has both spars, front and rear, bent and so, whole event is determined as aircraft accident. RH wing has to be completely replaced.

This is whole story from me side as pilot of this accident.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

This was simple ferry flight from DMW Airport to 2W2 local airport, distance 10 miles, flight time 6 minutes. There were no weather limits. No indications that something could go wrong. On left side of runway 34 is long, 8 ft high terrain wall/wave where aircraft collided by RH wing tip. No injury, no other damages to airport property, just RH wing tip hit. Replacement wing is already available and after RH wing installation aircraft can be returned to service.
