Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At about 12:40 on Sunday 07/05/2026 I departed KEEN in N5205K to fly to Parlin Field (2B3) in Newport NH. I climbed to and cruised at approximately 3000 feet MSL. About 15 NM out, I tuned 122.8 for Parlin and monitored that frequency. As I approached the destination, heading approximately North at about 2500 feet and descending, I saw an airplane about to cross to the west at a lower altitude. Assuming that it had departed from Parlin, I called out on the frequency asking if they intended landing. No reply was received. I continued my descent and reporting my position as I entered the downwind for runway 30, the grass. On downwind I lowered the gear and completed a prelanding check. At the base turn, I again announced my position and intent. As I was turning from base to final, still descending with gear and flaps out, I heard a radio call saying "final for 18". I immediately reduced my descent and radioed a request for the other aircraft to hold off as I was on final for 30. The other aircraft acknowledged and I resumed descent. My final approach ended up being steeper and I touched down with less remaining runway than required for a safe outcome. I pressed on the toe brakes as much as possible. That is the last memory I have. The next thing I remember is waking up in the ambulance with the EMTs telling me that we were waiting for the helicopter.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

- 1) When I first saw that lower altitude aircraft in the airport vicinity, I could have held altitude, observed its movements, circled the field, and then set up a more stable approach.
- 2) When I heard the "final for 18" call, I could have terminated my descent, cleaned up the flaps and gear, climbed to an appropriate altitude and started over.
