Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Landing gear, L & R broken axles, Lower left wing underside damage, wooden propeller one tip damage, L & R wheel damage, L & R brake damage, Left shock strut upper attach fitting bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

A local pleasure flight was flown from KHAO, lasting just over one hour. Departure time was approximately 10:30AM.

Weather conditions were VFR, with light and variable winds, that were predominantly from the North.

Time of landing was approximately 1140 EST.

Runway 30 was used for landing.

A normal entry and landing pattern was flown.

Touchdown was on speed, (approximately 40mph), on centerline, normal sink rate and smooth. No hard landing occurred.

Very shortly after touchdown, the aircraft veered right of centerline.

No change could be managed, despite correct and positive control inputs.

The aircraft continued to slowly turn right and began sliding sideways, with the left wing lower than the right.

The left main wheel, then very soon after, the right main wheel became detached. The airplane continued sliding sideways and the engine stopped.

All motion stopped at the right, (north side) edge of the runway. Orientation of the stopped aircraft was approximately 95 degrees right of runway heading.

The remaining left main landing gear components were down several inches into the sod at the very edge of the pavement.

I turned off the magneto switch, exited the rear cockpit, and assisted passengers out of the aircraft.

There were no injuries. No fluid leaks of any kind. No fire occurred.

The ELT did not activate.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Foreknowledge of metal fatigue in this case is not possible. Inspection of the interior components in this case is not possible.

Structural materials can have undetected flaws, and in this case no flaws were detected prior to the incident.

I'm not able to provide any recommendations as to how this incident could have been prevented.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The aircraft was independently inspected by two expert A&P mechanics, with no direction given to guide their conclusions. Both placed the primary causal factor on failure of the right landing gear wheel axle. Initially this axle bent under load. This caused the right wheel to impinge upon the right shock absorber and stop, having the effect of locking the right wheel. With the right wheel locked, directional control was impossible, the airplane slid sideways and side loading of the wheels caused both axles to fail, wheels detached and all subsequent damage.

No control inputs or use of brakes could overcome the sequence of events.

Total Time/ Cycles On Part

_____ Hours

_____ Cycles

Time Since This Part Inspected/Overhauled

_____ Hours

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

25.0 Gallons

Fuel Type

☒ 100 Low Lead☐ Automotive☐ Jet A☐ Jet A-1☐ Unleaded AV☐ Other, specify _____

Other Services, if any, prior to departure:

None.

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

PIC exited rear cockpit normally. Passengers exited front cockpit normally.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft.)

Aircraft Registration Number

Manufacturer: _____

Damage to Other Aircraft:

☐ Destroyed☐ Minor☐ Substantial☐ None

Model: _____

Registered Owner of Other Aircraft

Pilot of Other Aircraft

Name: _____

Country: _____

ADDITIONAL INFORMATION (Additional space for answers to any question.)

Aircraft year of mfg is 1930.

Airman flight time matrix on this form filled out from memory, actual times are close, but could be different.

_____ utilizes BasicMed. Renewed on 6/30/2026.

Engine date of mfg is unknown.

Total time on engine since mfg is unknown.

Airframe total time is unknown.

Pilot occupation is retired airline captain.

Pilot instructor flight time is from US Navy Flight Instructor duty, not civilian.

Passengers were seated together in the front cockpit. This aircraft certified with a single lap belt for all front seat occupants.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE.

I understand that the information provided may be subject to public release.

Date of this report:

08/01/2026

mm/dd/yyyy

Name of Pilot/Operator: [REDACTED]
