

Helicopter Accident Statement

[REDACTED]

August 25, 2026

Aircraft Mechanic

On August 24, 2026 helicopter N979SH was flown for the purpose of pre-inspection flight before coming down for an 100 hour inspection. During this flight all the instruments were checked and all operations were satisfactory. After all the maintenance checks were performed PIC Anna Leese flew the helicopter to the end of the runway where she was trying to train me how to hover the helicopter. While hovering low to the ground helicopter suddenly shifted hard to the left side and ended up hitting the ground and crashing. Helicopter crash occurred August 24,2026 at approximately 2:56 PM. Me and the PIC both got out of the aircraft safely and waited for maintenance and administration to arrive.
