NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

[REDACTED] and I took off at approximately 1400 CDT. I did the pre 100-hr maintenance hover checks, then I took the runway and took off to the south to fly over the bay and perform the pre 100-hr maintenance straight and level checks. I flew over the bay with [REDACTED] for 20-30 minutes before returning back to 2R4. Upon return I gave [REDACTED] the controls one at a time (pedals, collective, pedals & collective, cyclic, all) to teach him how each of them worked. Once it was time to turn base, I took the controls and landed us, and proceeded to do another pattern. Upon landing I asked [REDACTED] if he wanted to try to hover, and took him to the Southwest Sod at the airport. I gave him the controls, one at a time staying appx. 7ft agl (pedals, collective, pedals & collective, cyclic, all) and took them back a few times to recover any unusual attitude. On the final time I gave [REDACTED] the controls, he overcontrolled the cyclic left and aft, the left aft skid hit the ground and the aircraft bounced back up, I tried to correct the motion by applying right lateral and forward cyclic and raising the collective to climb out. My control input did not correct the movement. The left aft skid hit the ground and we continued the roll to the left. The blades hit the ground a couple of times before stopping. After the blades had stopped the left side of the fuselage was contacting the ground and the right side was face-up. When the blades stopped, [REDACTED] and I climbed out of the right side door of the aircraft, and I turned off the master battery switch.

Terrain: Grass

Departure: Approximately 1400 from 2R4

Destination: 2R4
