Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop will have to be replaced, Engine will have to be inspected for internal problems, Cowling will have to be replaced, Windshield is cracked will have to be replaced, Wing struts will be replaced both sides, wings will have very minor cosmetic work for punctures around gas tank caps, Lower Longerons have small bend on each side same place will have to be repaired, The Vertical Stabilizer and Rudder will have to be replaced. There is no fabric damage other than that I mentioned around gas tank caps and the vertical stabilizer and rudder. To my knowledge the aircraft is very fixable.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Pilot Statement

I came down to land and everything was good and made a good 3 point landing. The mistake I made was, I did not hold the stick all the way back, I relaxed it back to a neutral position and knew better, you must hold the tail down. The moment I put on the brakes I was on my nose and my momentum shifted me forward and caused me to apply the brakes harder and the plane flipped over on its top. It happened in a matter of seconds. This is what I believe caused the accident. I would like to blame this on something else other than pilot error but I can't.... No one else or any other aircraft were involved.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If a pilot could find someone in his or her area that has this type aircraft and go up with them and get more knowledge about this particular aircraft might help...
