Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Standard ground loop to the left. Damage to right wing, elevator, and main gear leg and wheel.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Planned fuel stop after leaving Grand Junction. Arrived over KRIF at 5000 ft AGL. My rapid altitude loss to pattern altitude set up a poorly stabilized approach. On turning final, I needed to add power to decrease the rate of descent. I should have gone around. Instead, I touched down above full stall resulting in a bounced landing. I came back to the runway surface 20 degrees to the right, over corrected to the left with some braking. The right main wheel was torn from the gear leg by the deeply rain grooved surface as the acft veered to the left. The groundloop was then completed at slow speed on the bare gear leg. No injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have executed a go-around rather than push an unstabilized approach to a terrible landing attempt.
