Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing fuel tank punctured. Wing damage inboard of fuel tank. Minor scratches on right side passenger door. Destroyed runway crossing sign.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying solo from Port Clinton KPCW to Toledo Express KTOL as part of my requirement to make 3 takeoffs and landings at a towered airport at approx 10:30 AM on June 9, 2015. I contacted ATC at Toledo 20 miles east and gained flight following and notified them that I was a student pilot inbound for full stop landings. They cleared me for a straight in approach to runway 25 and advised me to keep my speed up because there was a jet following me.

The approach was stable. I touched down at approximately 11:00 and swerved to the left and went off the runway to the south. The right wing impacted the runway crossing sign for RW 16-34.

There are two possibilities for the swerve:

1. I made an improper rudder correction for a right to left crosswind, trying to align to the runway or
2. A witness reported that I might have accidentally pushed the left toe brake when pressing left rudder pedal.

I am not sure which possibility occurred.

After the aircraft came to a stop about 30 feet south of runway 25, 1500 feet from threshold. I noticed fuel leaking from right wing tank. The runway sign that I hit was scattered in several pieces. I then notified tower via radio what had occurred.
