Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The whole front of the plane, front landing gear, partial wings.....

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I taxied to Runway 29. I did a visual check around the area in the sky to see if any other aircraft was in the area. My radio was on, I didn't hear anyone talking. My visual check was clear, so I went to Runway 29 and intended to take off. As soon as the plane started running, because the plane is so light, the crosswind was blowing from the north, pushed me off the runway, taking me to the ditch on the left side of the airport, crashing with a big rock in the ditch, causing the plane to flip and damaging the front and the wings. I shut down the engine and called my wife to come pick me up so I could come back with my truck to take away the plane. As soon as I came out from the ditch, I saw two guys coming towards my plane and they asked me if I was okay. I told them I said yes, I just have to go and come back for my plane. The guy said, SHOOT, we already called 911. I told them to tell them everything was okay, but 2 patrol cars and a firetruck were already there.... This all happened at approximately 8:15 pm. The intention of my flight was to just go around the pattern a couple times just for fun, a recreational flight.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I don't know. It's hard to predict things. The wind direction changed so rapidly. It was calm when I was taxiing, but quickly changed direction at takeoff.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
