Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

One taxiway sign and at least one light

Prop strike, collapsed left main and nose gear, tail strike, damage to the wing where it struck the taxiway sign, additional damage to the tail from striking some object.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KQMI at approximately 1500 local on an IFR flight plan to KAGC. I did a practice ILS approach to 28 at KAGC with 10 knot direct cross wind from 190 with some gusts. The visual approach began at 500 feet AGL. A brief wind gust occurred immediately before touchdown. The airplane bounced on initial touchdown and power was added to allow the airplane to settle into a normal landing, however the airplane bounced a second time. The decision was made to go around. Full power was applied, however the airplane drifted to the left of the runway. With this distraction insufficient airspeed was generated prior to removing the first notch of flaps. Loss of lift caused the airplane to sink. At this point the right wing dipped striking the ground followed by a taxiway sign causing the aircraft to turn 270 degrees and a hard landing causing collapse of the left main and nose gear, a prop strike and the tail to strike the ground. The plane stopped sideways on the runway. During the landing the airplane fuselage struck at least one runway light.
