Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft landed in a water filled slough, so prop strike, aircraft was flooded and substantial skin wrinkling evident.

No airport property damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was receiving C182 transition training. We departed from KCCR (32R) and performed airwork including slow flight and steep turns enroute O88.

We passed over O88, did a practice line up for 15 then entered downwind to 33.

This was my first approach in the C182, and on touchdown the aircraft began to porpoise. I immediately attempted a go around, but the airplane did not seem to be making any power and we were not climbing. We departed the runway and continued to mush along without climbing. I suspected the lack of power was because I had (initially) pulled the throttle the wrong direction, so I tried another direction which cut the power to the engine and we ended up in a water filled slough near the runway.

The airplane came to rest on it's wings on the slough banks w/the cabin half filled with water. Only the pilots side door would open, which is how all three of us left the aircraft.

Emergency services were prompt in responding, but luckily no major injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have owned two Piper Cherokees: a Warrior and now an Arrow and most of my flight experience is through these two aircraft. The C182 reaction at touchdown (i.e. the bounce) was a complete surprise. Also, the unfamiliar engine controls contributed to a bad situation, since (under stress) I was not confident about the engine settings.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
