Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Light abrasion damage to tips of strakes, abrasion damage to dorsal fairing, rudder lower cap destroyed, and lower rudder skin distorted.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Check flight in the local area. Part of flight included a no-flap landing, simulating a flap system failure. In the flare, the pitch attitude was high, and the shaker activated. At that point the pilot initiated a go-around and nothing out of the ordinary was observed. Normal landing followed. Upon post-flight inspection, damage was noted to the rudder, rudder cap fairing, aft dorsal fairing, and strakes. The nature of the impact and abrasion damage was consistent with a tail strike.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Prior to any flight involving intentional no-flap landings, a briefing about the potential for tail strikes in certain scenarios should be included.
