Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

THERE WAS DAMAGE TO THE FIREWALL, BUCKLED FLOOR BOARDS, THE PROPELLER BLADES HAD NICKS ON THE TIPS, AND THE ENGINE WAS REMOVED AND TORN DOWN

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 6 I was scheduled to do my solo x country in N178AF. I received a weather briefing from the FSS. The instructor, Peter Steiert, reviewed my Flight plan and gave me my endorsement. I went and did the pre flight and started the airplane. Then I asked for Flight following and I started my x country. When I arrived to Sulphur Springs I landed and taxied back to the runway without any problem. I took off again and I did the left traffic pattern and I landed again without any problem. Then I decided to do another traffic pattern and when I was on final I was too high but i decided to continue with the landing. I tried to maintain my airspeed at 65kts so I landed at the middle of the runway but i was going fast. So when i landed the airplane started to bounce. Every time more hard so I was scared and I decided to go around but there wasn't enough runway so I pulled the yoke very hard to climb up again. I departed KSLR I went to Greenville Majors because that was the next leg of my cross country. When i was there I tried to land twice but I couldn't so I decided to go back to Addison. I thought because of the previous bounces maybe the plane was damaged. So then I entered the traffic pattern at Addison and when I was on final I was very nervous. I started my landing approach at 65kts. After I touched down the airplane started to bounce very hard again. Then tower told me something about the nose wheel. So after bouncing 6 times, I shut off the plane in the middle of the runway and I declared an emergency with Addison Tower. I told them I was going to stay in the plane until the fire fighters arrived. Then the mechanics of American Flyers arrived to move the plane off the runway.
