Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to both main wings and left canard wing. Canopy Plexiglas cracked.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight started with takeoff from runway 28. Flight was planned to be closed traffic. Approach was made according to POH recommended speeds. Upon touchdown the aircraft had a left turning tendency. The runway was exited onto the grass to left of the runway 28. The main wheels rolled over a section of deep grass and the aircraft flipped over forward onto the roof. I exited the aircraft with no injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I suspect the the wheel alignment was part of cause of the left turning tendency upon touchdown. I will no longer be flying experimental aircraft.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
