NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My student and I had just exited RWY 21R at B5. We called ground and stated "Pascott ground, Universal 18 is at B5 would like taxi to Universal." Ground then issued the clearance "taxi Charlie, hold short 21L @ Charlie 4." While waiting we noticed there was no one on the airport except for us and one aircraft inbound on the Universal east arrival to land on taxiway Delta.

Ground then issued the clearance "cross 21L," I as the flight instructor took the controls assuming they wanted us to cross 21L direct back to Universal in front of the aircraft that were still some distance out. At that point Ground Control called us back, saying "Universal 18 cross 21L @ C4, D4 and follow company traffic." This is when in order to avoid a runway incursion I turned the helicopter into a tailwind and considering the high Density Altitude and strong winds the aircraft did not have enough power and it settled toward the ground, causing one bounce in the sod, the second bounce rolled the helicopter onto its left side.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

1. By waiting an extra moment and confirming if the ground's instruction was to cross 21L direct or instead cross 21L at C4, D4.
2. By confirming with ground if I was number 1 or number 2 to follow the traffic inbound.
3. Not turning the helicopter into a tailwind and stopping it as best I could in the sod facing into the wind to again avoid a runway incursion.
