NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Winds were reported on ASOS as light and variable. I set up a landing on Runway 27. There seemed to be a considerable left crosswind on touchdown. On rollout at about 35 mph ground speed left wing rose and aircraft veered to the left. I applied opposite rudder but aircraft ground looped.

I obviously failed to apply enough left aileron to keep the left wing down.

Additional factor could have been higher groundspeed due to high elevation.

☐

☐

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Apply better and more timely crosswind correction during rollout.
