NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Approximately 15:15 local time I circled the lake for wind direction and landing conditions and conducted a landing to the lake. I taxied to the location of the clients and loaded the plane starting with 150 pounds of their personal baggage and left the camping gear for a later pickup. The clients were loaded next with two in the middle row of seats and one in the right front seat. After they were loaded and secured I pushed the plane out and let it sail back enough to start and get turned around. I back taxied the plane and once it was turned into the wind(right quartering approximately 30 degrees) the takeoff was initiated around 15:35. The plane got on step and I then turned it straight into the wind and lifted off the water in around 1200 feet. Once it broke water and the plane was gaining airspeed the climb was initiated. I was around 30-50 feet above the tree line and encountered a downdraft and lost 30-50 feet of altitude. After losing the altitude one of the floats struck the top of a tree thence pulling the plane down into the trees. The plane fell straight down upright and I asked if everyone was ok and proceeded to secure the plane. Once secured the airplane was evacuated and looked over to make sure there was no leaking fuel or trees that would cause harm, the plane was double checked that it was secure and the baggage was unloaded to gain access to a satellite phone. I made appropriate calls to the management and got the process going. There was no visible injury to the clients or myself. This was the second trip of the day I had made into the lake. Wind speed was the same with the direction had moved from more northerly to north westerly. The first trip was a moose on board that was brought back to Bethel. The flight plan was to leave Bethel, transport people to a lake 80 miles NW of Bethel, fly 25 miles east to the lake where the accident occurred and return to Bethel.
