

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: HERINGTON State: KS

ZIP: 67449 Country: USA

Latitude: 38-41-683333N Longitude: 096-48-478333W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 09/16/2015 Local Time: 2:00PM

mm/dd/yyyy

Time Zone: CDT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N909HC

Manufacturer: CESSNA

Model: 172-N

Serial Number: 17270803

Year of Manufacture: 1978

Amateur-Built: ☒ Yes ☐ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2300 lbs

Weight at Time of Accident/Incident: 1870 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Underbelly damaged from nose gear slamming onto runway 5 times, Gouged Tire, Propeller (I'm guessing) struck the ground and bent one tip.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Originally I planned to go from KEWK KLWC KOWI KUKL 13K KEQA KEWK. Took off KEWK around 11:45 am and stayed in the pattern to test the winds. Winds were 180 at 18 gusting 24. Landing went well, so took off again and turned towards KLWC. Flight was supposed to take 2 hours 38 minutes so I should have had plenty of time. I Landed at KLWC at around 1:15 pm immediately departed KLWC and turned towards KOWI. My ground speed was roughly 75 kts ground speed in the headwind and decided that in order to get back to KEWK in time I would deviate from my original plan. I turned back towards KEWK and continued my flight. While flying by KHRU I decided to go see how the airport is as I have frequented the city of Herington quite often and saw that it would only add 5 extra minutes to the flight. So I turned to KHRU and started looking up the information necessary to make a landing at the airport such as elevation, pattern altitude, runway choices, runway lengths, CTAF, and weather information. When I was about 5 NM east of the airport I turned on COM 2 to listen to Abilene's awos, as KHRU did not have weather reporting on site, to make sure there was not too much wind to land. When I turned on the awos frequency the weather was Winds 160 at 17 gusting to 24 at 1:50 pm. The landing started out looking like any other normal landing, turned downwind, did gumpc checklist, crossed end of runway, reduced power, 10 degree flaps, turn base, 10 more degrees, turn final (since there was so much wind I decided to only leave the flaps at 20 degrees), on approach my air speed was 70 KIAS, crossed threshold of runway, pulled power out fully, flared, and main wheels touched down (at this point I am not certain if the nose wheel touched down also). The landing was pretty decent and was not rough whatsoever. Then all of a sudden the plane started ballooning up from a strong gust of wind, I lowered the nose of the airplane slightly as to avoid a stall. I was then forced back to the ground violently, and once again ballooned up. The plane ballooned up and was forced down 5 times and felt like all 5 times were on all 3 wheels, but may have not been. I have never experienced this type of ballooning effect and have not been taught how to correct this situation, possibly because it hasn't happened. I have ballooned slightly while still in the air and due to flaring too soon, but not after already touching down. After the violent tossing about of the plane stopped and I taxied off the runway and put on the parking brakes. I took 1 step outside of the aircraft to see if I could notice any damage. Did not notice any damage so I began to taxi back out onto the runway to continue back to KEWK. While taxiing and turning the yoke I heard a loud knocking noise and the controls were difficult to manipulate, so I turned back around and parked at the ramp to call my instructor Adam U. I shut off the aircraft, put on the parking brake and stepped outside once again to inspect if there was any visible damage. One of the propeller blades' tips were bent back about 10-15 degrees, I also noticed the tire had a gouge in it and the controls still had a knocking noise when turned. I called Adam U. and waited for someone to come to KHRU to pick me up and look at the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Discussed the incident with Dan Miller and he advised me what I should have done in order to correct the porpoising. I now know that I should have added a little power after the initial ballooning or if it is severe add full power and go around. I have reviewed ballooning/porpoising on the FAA's safety.gov website and will discuss the situation with my instructor and peers to make sure they know what to do in that situation. I will make sure to check more than one AWOS if the airport does not have AWOS on site, and make sure to teach others about this as well. I have also set my own personal minimums for winds which are lower than Hesston's requirements.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
