Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft was considered totaled by insurance adjuster, no damage to other property

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the afternoon on the day of the accident I noticed there were some beagles on the west side of the runway. After pre-flight checks and performing the run-up and final checks I taxied the plane to the east side of the runway to give the dogs as wide a berth as possible. After applying takeoff power and shortly after breaking ground the left wing tip passed through the outer edge of a tree.

The friction of the wing passing through the outer edge of a tree caused a sharp left turn which pointed the plane directly at the tree line. The plane quickly entered the tops of the tree line and ended up in a thick grove of trees. Unfortunately I lost my precious little plane of 15 years.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Always line up for takeoffs in the center of the runway and always land in the center of the runway. If there are any objects preventing this the takeoff should not be made or the landing should be diverted to another airport.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
