

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Arctic Village State: AK

ZIP: _____ Country: USA

Latitude: 68.34290 Longitude: 142.34129

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 09/24/2015 Local Time: 1300

mm/dd/yyyy

Time Zone: ADT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N2528C

Manufacturer: Cessna

Model: 170B

Serial Number: 26172

Year of Manufacture: 1954

Amateur-Built: ☒ Yes ☐ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2200 lbs

Weight at Time of Accident/Incident: 2140 lbs

Number of Seats: 2 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 1

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☒ Normal
☐ Restricted
☐ Aerobatic
☐ Limited
☐ Balloon
☐ Provisional
☐ Commuter
☐ Special Flight
☐ Transport
☐ Experimental
☐ Utility
☐ Special Light-Sport
☐ Experimental Light-Sport

☐ Certificate of Authorization or Waiver (COA)
☒ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☐ Tricycle ☒ Tailwheel
☐ Amphibian ☐ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☐ None ☐ Unknown

Engine Type (Select one)

- ☒ Reciprocating ☐ Liquid Rocket
☐ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

☒ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☒ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left gear and wing came off plane. Prop bent. Fuselage aft of baggage compartment split, bent. Damage to belly and cowling. Windshield broken. Left door off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The takeoff/strip area is a gravel bar. Gravel is mostly medium sized (3"-5") to some large (8"-10"). Gravel and rocks are frozen into the soil. There is no snow or other contamination, surface is hard. Temperature when pre-heat started was +18F. At takeoff, temp was about +22F. I placed 3 stakes with flagging along the gravel bar so that I could continually observe wind for direction and shifting (one at either end, one toward the middle).

We decided to move camp downriver for a few days which would also be closer to our destination when we left the area.

I prepared the a/c for flight; pre-heat, inspection for frost (none), pre-flight completed. I spoke w/ a Piper a/c that flew upriver, and then back down. Asked about weather and conditions, he said everything was good, no problems or concerns. Weighed all gear and baggage with scales and loaded aircraft. At about 1300, the passenger and I climbed in, set and locked seats, and buckled up.

I started the a/c and continued using the checklist. All controls free, flaps set, instruments, engine, fuel, and systems checked out. Run up, carb heat, mag check, prop cycled all correctly. Idled until oil temperature started to come up. Checked wind direction, still correct.

I taxied to the downriver end of the gravel bar, approximately 620' from the upriver end, turned 180 degrees, verified flags still blowing toward us, and started the takeoff roll. Initial +/- 200' is slightly up hill. 420' from the take off end (+/- 200' from start of takeoff), the gravel bar is flat, and then starts sloping down slightly to the end. Flag at 420' from departure end was blowing toward me. Airspeed was climbing as we past the 420' mark and started downhill. I looked back at the airspeed, and it was no longer increasing. I looked at the furthest flag at edge of river, it was blowing directly away from me; in the same direction as my takeoff roll.

The distance remaining was too short to stop without ending up in the river, which was swiftly flowing right to left. At the edge of the water I pulled the plane up, forcing it to fly. I attempted to stay in ground effect, but I had to clear a gravel bar about 200' in front of me, then some brush that was about 8' tall. I started a gentle left hand turn. If I had turned right, I would have remained over open water, and stalling, would have ended up in the river. I had to continue that left hand turn due to some trees on the far side of the river. I aimed for a clearing on the edge of the river to the left of those trees.

We cleared the river when the plane stalled, left wing first, which was already down. The left gear struck the edge of the cut bank, left wing striking level ground. The fuselage hit right at the top of the bank, and the aircraft spun counterclockwise and remained upright. The nose came to rest pointing to the left and back at a position of "8:00" in relation to my direction of flight.

The area is a river valley. The river is quite winding, many gravel bars with open areas and which have low to medium height brush (2'-12') and trees set back from the gravel bars. Distance between the hills on both sides of the river varies. In the direction of takeoff the nearest hill, or significant rise above the valley, was about 1/2 mile away. Hills and terrain were not a factor.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I would take off empty, or with minimal known weight to ensure that the aircraft would perform as planned. I could then land to reload, or if partially loaded, fly to another gravel bar that was longer, and stage from there, returning to the point of origin empty, and then continue to shuttle gear and people. That first flight would have been better planned without another person on board, not just due to weight, but due to risk to that person.
