Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft propeller bent, nose wheel is canted to the left, left wing tip bent upwards, top of vertical stabilizer cracked, right wing tip cracked, trim wheel broken, left front seat loose, artificial horizon damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed at 1930 central from Flying Cloud (FCM) for a VFR flight to home base, Shiocton (W34). Landed at approximately 2300 central time at Shiocton on runway 18. I had landed at night on this specific runway twice before, once with an instructor and once by myself. The last time I landed on this runway at night was 8/31/15. On the night of the 19th, I was on short final (about 100 feet AGL) when my landing light burnt out. Due to the grass environment at W34, there were only two runway lights- a green light at the approach end of runway 18, and a red light at the departure end of 18. As a result of the burnt out landing light, I lost depth perception and impacted the ground on all three wheels and bounced. When we bounced, our right wing tip clipped the cornfield that was to the right of runway 18. This sucked us into the cornfield and then flipped us over, tail over nose.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Two forward facing lights (taxi and landing, or two landing lights) or a properly illuminated runway (lights on both sides for the full length).

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Stephen Williams acted as safety pilot for a simulated IMC flight under VMC conditions. On a completely unrelated note, he dropped his log book as we were climbing into the aircraft at FCM prior to departure. FCM is mailing the log book to Stephen, but I do not have Stephen's pilot certificate, medical certificate, or log book readily accessible. I do know that he is a licensed private pilot, single engine land, day current, with about 500 hours total time.

The aircraft logbooks are currently with the FAA, so I was unable to get precise inspection dates/times or engine/airframe total times.
