Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Landing gear sheared off, ~~engine~~ prop strike, dent in left wing strut due to landing gear hitting, damage to belly skins

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

- I was on a routine VFR flight
- On return to airport (KAPA) received ATIS, contacted Tower and was cleared to land on 35V2
- Approximately 3-4 miles from runway threshold, elevator disconnect leaving no elevator authority for remainder of flight. Only pitch control was from power setting and elevator trim. Continuous pitch oscillations upon descent which were augmented with each change in power.
- I slowed plane, created a decent profile and deployed or trim flaps for landing. Flaps were deployed to minimize approach speed and allow option of flap retraction in order to keep plane (gear) on runway if able to adequately touch down.
- Was able to maneuver aircraft over runway and level off. While bleeding off speed plane pitched nose over and impacted runway.

RECOMMENDATION (How could this accident/incident have been prevented?)
