Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Front Canopy destroyed, Significant damage to 2.5 foot section of Upper surface of left wing upon inverted impact with trees after bailout. Minor damage in other locations.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

See Attached.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- More foresight on behalf of the pilot to communicate with the rest of the sailplane community on the ground to aid in decision making for alternative options to descending through the closing gap while still at higher altitudes.
- Explore lower cost and lower power-consuming artificial horizons for sailplane use. MEMS gyros are incredibly expensive, yet the aviation tag suddenly causes a potentially life-saving device to be cost-prohibiting (minimum of \$1000) when it could be had for under \$200.
- Continue education and promotion of hazardous pilot attitudes, particularly those that explore the psychological difficulty in continuing to explore multiple alternative solutions while executing your primary solution.
