Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Water damage to aircraft due to water landing. Aircraft is intact and has been removed from lake.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At around 01:45am local I decided to land at Woodsville Airport (09R) as my fuel level was indicating to be 1/4 tanks. On landing at 09R I realised that the airport didn't have "self serve" fuel. Upon realising this I asked Houston Approach my options for a near by airport to grab fuel, the advised me that Jasper County Airport was just 18 miles to the east. On seeing that my tanks still read 1/4 I decided to take off and head over to Jasper, even calling the airport ahead to make sure I could get fuel. After take off I make a right cross wind departure, then climbing up to 3000ft. After around 4 minutes in the cruise the engine spluttered and failed to restart even after switching tanks and trying all emergency check list procedures. After asking Approach my options I realised that I was pretty much half way between the two airports, with zero chance of enough glide ration to make it back. I declared MAYDAY at around 02:15am and then begun considering my limited options. I didn't want to put the aircraft into the woods for obvious reasons, nor were there any straight clear roads safe enough to make an emergency landing. In the moonlight I caught the sight of a lake to my left. I made the judgement call that this was the safest option for us to ditch. I banked gently to the left so I could comfortably establish finals on the lake, keeping the published glide speed for the A36 the entire time. I kept the aircraft clean, I.E. landing gear and flaps up. I then leaned over to unlatch the passenger door ready for impact and for my passengers to be able to exit safely as quickly as possible. I approached the water and flared the aircraft as if I would on a soft field landing, holding the airplane off the water as long as possible, thus making the impact safe and smooth. The aircraft then settled on the water and my passengers jumped out of the plane onto the wing, after securing the aircraft, I then left too... I was the only very minor injury due to me removing my shoulder harness just before impact so that I could release the door catch for my passenger. The aircraft then began to sink and we endured a two hour swim to safety, not knowing that the lake was infested with alligators and snakes! Thank God we made it...

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The fuel gauges were not reading correctly, even if empty then they were still showing 1/4 tanks...
