NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight started at Dutchess County Airport (KPOU) at approximately 9AM. I was piloting the aircraft and acting as PIC. A friend of mine, John Morgan Cobb, who happened to be driving by at the airport that day came along as a passenger. I made four uneventful takeoffs and landings using runway 6 under the direction of the control tower. The forecast for the time period of 8-10 AM that day was for VFR conditions with winds from 300 degrees at 5 mph. The 8:53 KPOU Metar showed the winds in actuality to be from 020 degrees at 10 mph. This change in winds was confirmed by the wind sock on each of my landing approaches. Upon completing the fourth landing, I requested a straight out departure from the pattern with the intent of flying to Sky Acres Airport (44N) 8 miles away.

Upon approaching Sky Acres, I monitored the unicom frequency, entered a left downwind for runway 35 and followed another aircraft on a long final. The wind sock confirmed the winds being reported at Dutchess. The final approach was normal and stable. Upon flaring approximately 10 feet off the runway, the aircraft encountered violet wind shear. The left wing dropped rapidly, the aircraft ballooned 20 feet further upward, turned to the left and headed for a tree line and rising terrain. Full throttle was immediately applied with carb heat pushed in. As the ground came up to meet the aircraft, all efforts were made to not stall, avoid the tree line and turn back to the runway. I estimate that the right main gear contacted the grass at about the same time the left wing struck a tree trunk. The plane spun around to the left and came to a halt with the engine still running. I shut down the engine, doors were opened and we exited the aircraft totally unhurt.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

More clearing of trees necessary at Sky Acres airport
