Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to leading edge of right and left wings and spar of right wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had departed Niagara Falls International (KIAG) and flown up to Lake Ontario and west to D80 with flight following via Buffalo Approach. I terminated flight following when the field was in sight, informing Buffalo Approach that I would be landing. I was just going to make a full stop and take-off again and then fly back to Martinsburg, WV (KMRB). I like to land on various strips, including grass strips, as a means of keeping my proficiency up.

0.6 hours after take-off from KIAG, I was landing in clear daylight no wind on the grass strip at D80. Just as I touched down, and while still rolling, I observed at least two (2) deer exit the wood line to the right side of the strip and walk onto the strip just ahead of me. I attempted to avoid the deer by adding power and pulling back on the yoke but though I cleared the deer, the aircraft dropped back onto the strip and began to bounce towards the end of the strip and the trees beyond. I did not have enough speed to take off and could not slow to a stop in time to avoid the trees. I got the nose between the trees but both wings impacted trees and were damaged. There were no injuries and the aircraft performed properly at all times.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Be more alert for deer. Don't land at unfamiliar airports.
