Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While practicing take off and landings at KDMW the aircraft had a hard landing. The student pilot's set up and approach to landing were both smooth and correct for the aircraft and conditions. However, the aircraft landed on its main gear. It then bounced and landed flat on the main gear and the nose wheel at the same time. After landing the plane was taxied off the runway where an operational check of the flight controls, steering, and brakes was performed. No problems or unusual conditions were observed during this check or in the subsequent run up and flight back to KFDK. After returning to KFDK at the end of the lesson, the hard landing was reported. Mechanics at the school removed both the upper and lower cowl and discovered damage to the firewall of the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Landing flair should have been lower preventing the plane from dropping onto the main gear causing the bounce and flat landing.
