NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was an instructional/Solo flight. I along with my instructor lifted off at approximately 0745 hours and joined the traffic pattern for RWY 8L at F45. I along with my instructor had completed a flight in the pattern at which point we returned to the ramp where my instructor exited the aircraft and I began my solo flight which was scheduled to be repeated flights in the pattern.

I had made each pattern flight to a full stop. Once the landing was completed I would pick up, complete a left pedal turn and depart for another lap in the pattern. I had done this sequence 8 times without any issues or areas of concern. On the final approach all instruments were normal, I had no warning lights or audible indicators, there were no vibrations in the controls, and there was no vibrations coming from the main or tail rotors. I was at the bottom of my approach transitioning to a hover. I was gradually pulling power with the collective while simultaneously applying left pedal. As I entered the hover the aircraft began to yaw rapidly to the right at which time I applied more left pedal however the aircraft continued to yaw to the right. While yawing to the right I contemplated applying forward cyclic to gain airspeed and try to recover but I did not make this control input. Before I made any further control inputs the aircraft began to wobble at which point I made the decision to lower the collective and put the helicopter on the ground. On impact with the ground the helicopter bounced one time and skidded to a stop. Skid marks indicated the aircraft was still yawing to the right. It should be noted my landing spot was the intersections of taxiway "C" and Taxiway "F". This is a common landing point for helicopters at this airport.

Once on the ground I lowered the throttle and began shutdown procedures.
