NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Sunday, December 13, 2015, at approximately 1:00p, I was participating with several aircraft to scatter the ashes of a friend and fellow pilot at the Shiloh Airport (KSIF) in Reidsville, NC. Before the flight was made, I held a briefing for the pilots participating in the function. All FAR's were complied with for the flight to be sure that safety was the issue of priority. All measures were made to be sure that as the ashes were scattered, no person or property on the ground was in any reasonable danger of harm. All safety measures were discussed to be sure that the flight could be completed safely.

I was caring the ashes in my aircraft, and they were to be scattered from approximately 50 feet above the ground and away from any people or other aircraft. As I approached 50 feet AGL, I reduced power on my aircraft to slow the airspeed to approximately 70kts. At this point, the bag containing the ashes started tearing and the contents started spilling into my aircraft. In a knee-jerk reaction, I tried to secure the bag. At this point, I feel that I let go of the stick momentarily. I do not remember exactly, but I believe that to have happened. At that point the aircraft nosed over. I grabbed the stick about the time of impact. As I pulled back, the aircraft impacted the ground. It then bounced back into the air. I recovered control of the aircraft as it bounced, and I tried to land the aircraft in the smooth grassy area beside the runway. I made what I believed to be a fairly nice landing, but I did not know that serious damage had been done to the left main gear. As I touched down, the left gear collapsed. After that, the cowling and prop hit the dirt. The aircraft then did a sliding 90 degree turn to the left in the grass.

This recap of the accident is to the best of my recollection.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Would have been better and safer to have had two people in the aircraft. One as pilot, and the other to handle dispersing of the ashes.
