Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft was destroyed due to post impact fire.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed runway 24 at Long Island MacArthur Airport at 1453Z for a personal flight to Brookhaven Airport. When the ISP control tower told me to proceed on course I made a left turn eastbound. I climbed to 1,400' and I received radar service with the ISP control tower until I exited the five mile ring and at that time they told me to squawk 1200 and they approved a frequency change. I listened to the Brookhaven Airport ASOS and called the HWV CTAF for an airport advisory. The CTAF advised runway 24 and I entered the right downwind for runway 24 at 1501Z. I encountered a light right crosswind and I allowed the aircraft to drift to the left of the centerline. I entered the left closed traffic pattern for runway 24. The next landing appeared normal until I started my landing roundout. I felt a small impact and the aircraft pitched down and skidded down the runway. When the aircraft came to a stop I noticed smoke and flames coming from the lower left side of the aircraft just forward of the firewall. I quickly removed my 3 point restraint and exited the aircraft with my passenger as soon as possible. We ran clear of the aircraft and I called 911 and asked to be connected to the fire department.

While I was waiting for the fire department to arrive I walked to the runway threshold and I noticed a snow berm that appeared to have been pushed to the runway threshold during snow plow operations. I estimated that the snow was approximately five feet high and twenty feet wide. It was centered on the runway centerline. I was able to see evidence of where my nose wheel tire had struck the snow berm.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident could have been prevented if I had landed further down the runway. Furthermore, if the airport had not piled the snow at the approach end of the runway this could have been prevented. Finally, this accident could have been prevented if there was a notam alerting me to the snow berm.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
