Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Bent firewall. Unknown if classified as "minor" or "substantial."

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On or about 23 March 2016, around 1300EST, I was flying solo as a student pilot in N65329 doing pattern work (full stop taxi back). On the first landing, I was in the proper glideslope based on the PAPI lights. The aircraft was at about 65 knots as I crossed the threshold with full flaps. Upon crossing the threshold, I pulled the power and just before touchdown I flared the aircraft. Just as the main wheels touched the ground, a gust of wind caught the aircraft causing it to balloon and it bounced, came back and bounced again. I applied full power, leveled the nose and gained airspeed. After a rise in airspeed and stabilized altitude, I notified the tower I was going around. Go around and subsequent landing was uneventful. I spoke with an instructor in the run up area and prior to taking off again, I heard the winds had kicked up to the school max, and I asked the tower to taxi back to the flight school. Taxi back was uneventful. I was instructed to write a statement back at the flight school.
