Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Passenger on board: one

Wind was from 330 at 6-7 knot

Runway 35 KOGB, Orangeburg, SC

After doing a preflight check the plan was to do some take off and landings then do a short x-country flight.

The 1st landing was a full stop and taxi back to the start of 35. On 2nd and 3rd takeoff and landing were touch and goes. Prior to the accident, I did not feel any flight control issues.

In the 4th traffic pattern, I listened to the ASOS for change in wind but it was the same as above. I did a standard approach and landing on runway 35. On takeoff, I pulled carburetor heat off and reduced flaps to 0 degrees. The plane was under control and over centerline. As I applied full power I applied right rudder as in the other takeoff prior to counteract the engine power. Soon after full power and before liftoff, the plane was on runway and on centerline prior to directional control loss, the plane started turning to the left then sharply. I applied more right rudder and after seeing no response immediately pulled power before leaving the runway. With no change in direction, I applied full brakes. The plane went across the grass, down a small bank, hit a swampy area and the nose wheel of the plane dug into the mud and flipped over on its back. There was no wreckage distribution.

After the plane had come to rest I turned the master switches off and the fuel to off and secured it.

I called my friend, Mr. Carroll Joye to let him know about the accident.

I have flown Cessna N2124E 2 time with 2 hours' flight time, with 10 standard and cross wind takeoff and landings.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Unsure of cause of accident...

Verify that there is no obstructions in and around rudder pedals. (rudder pedals and flight control were free and clear in preflight checks)
