Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

prop strike, prop bent but repairable, dents in both wing leading edges, bent tube in tail section, bent elevator

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

at 1330 local I departed lake hood to meet another pilot at Bold Airstrip (A13). After meeting at A13 we departed in our own aircraft. Intent was for the other pilot to show me some places that are used for off airport landings in the Knik Valley region. We landed at the strip where the incident occurred. The other pilot landed first and said it would be safe to land my aircraft. The strip was firm when we landed but we were on the ground for about an hour before attempting to takeoff and the day grew warmer and the strip became softer. Upon takeoff I hit a soft spot and realized I would have to abort the takeoff. There wasnt adequate braking action to bring the aircraft to a stop and I hit a small bump near the end of the strip and went into the alders at the end of the strip. I immediately shut the engine down and exited normally through the left door. The other aircraft had better performance than my plane and was able to depart. We communicated via a handheld radio I had and coordinated for him to pick me up at a more suitable location. I had full survival gear and i walked to the other location where he picked me up.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have had a better grip on how my aircraft would handle in the softer terrain and the lack of braking action that would be present with the softer terrain and planned to abort earlier than I did. I also should have taken into consideration the time of year and that the ground was likely to be soft and shouldnt have landed there.
