Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear collapsed; props bent; lower nose/engine fairings cracked.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Scheduled cross country flight from KAUG to KFVE to KSFM to KLEW. Departed KAUG approximately 0820. Landed KFVE at approximately 1000. Runway had visible ice and snow coverage, however braking and steering were good upon landing. At takeoff, applied power to commence roll, then applied full power. Upon full full power, the aircraft started sliding to the left. I attempted to control the sliding with additional right rudder pressure. During acceleration, the left main landing gear got trapped in an ice ridge which forced the aircraft to severely swerve to the left into the snowbank. The aircraft went approximately 75 off the runway, ending in a nose down attitude in the snow.
