Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller, Engine and engine mounts bent.
Vertical stabilizer and rudder bent.
Wind screen broken.
Upper surface of both wings have abrasions along with left outboard leading edge scraped.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Two a/c flying in tandem from Portales, NM., to East Troy, WI. I was following the other a/c and after his having landed, I proceeded to enter the left cross wind for an extended straight in visual approach and landing to Rwy 32 at EVU. I touched down at 50-55mph...I rolled down the center line with a slight left drift. I applied right rudder to compensate and in an instant the noise and sensation of flipping was evident...I was on my back. It took two hands to release my seat belt. I injured my scalp as I released it from the inverted position.
