Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

There was substantial damage to the PA12 since it came to rest upside down. the propeller was bent and the front fuselage cowling was wrinkled. the left wing was damaged and the tail area was also damaged . the plexiglass windshield was shattered. the wheel struts were damaged as well.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On the evening on May 11, 2016, I departed Simsbury, CT airport 4B9 at around 6:00pm in my PA 12 N3506M along with my son Tucker Jones for a half hour sightseeing tour of the area. We took off on runway 3 and flew out west a few miles and then up to the Congamond Lakes area and back. We stayed out of the Bradley airspace and flew at an altitude of about 1500ft. Upon our return we enter the pattern on a downwind for Runway 3 and upon left base we communicated with a Cessna holding short for the same runway. I communicated that we would land on the grass to the left of runway 3. We were a little fast and deep into the grass side strip and we bounced once or twice and I decided that a 'go around' would be best. With full throttle I tried to take off again and it was a little too late because we hit the fence at the end of the runway area and then the low trees across the road. The plane topped over the trees and we came to rest upside down. We climbed out and there were no injuries. I gave a statement about what happened to the CT state trooper on scene.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It was my error to land with too much speed given the length of the runway. More time practicing a 'go around' is the only thing i can think of.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
