To whom it may concern

On May 13th 2016 at approximately 2pm I was holding short of runway 27 at Crystal River-Captain Tom Davis Field. After I made my call I began to taxi on to the runway to remain in the pattern for another landing, and as I was on the center line of the runway I put full power into the aircraft, at around 60 knots began to rotate, right around this time I noticed I had flaps in and attempted to take them out and within a few second after I was hit by some wind from my right side and I was sent back on to the ground. When I returned to the ground I was to the far left of the runway and at this point I believe I tried to regain centerline but at the speed I was going that attempt to regain centerline may have been what sent me off the runway.

Before ending up in my final position off the runway. I cut the throttle and turned off all switches I could, at the complete stop when I realized I was alright I continued to cut the fuel and exit the aircraft. Looking back at the situation many times in my head I do realize that instead of attempting to recover the take off I should have abort the takeoff.
