Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left Main Gear, Left Wing, Propellor, sudden engine stoppage at idle power, skylight cracked.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Please see narrative provided to FAA inspectors - Philadelphia FSDO.

Add'l notes: Aircraft landed on runway roughly aligned with the runway direction but while drifting north. Landed on left main gear first causing the gear to shear. The aircraft then slid off the north side of the runway while rotating anti-clockwise and came to rest tail north in a ditch to the north of the runway. There is several dozen feet of flat grass covered ground prior to the drop off into the ditch and the aircraft seems to have dissipated much of its energy while sliding on the left main gear attach point and the right main gear and tailwheel. No immediately apparent damage to fuselage, right wing, empennage or engine cowling. Prop did strike the ground at idle thrust when left main gear sheared. Damage appears to be limited to propeller, left main gear and left wing, skylight.
