Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damaged right wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Taxing in to park on the ramp at the Shawnee Airport at approximately 0835L on this date, the right wingtip struck a light pole. The planned parking spot was the SE corner of the ramp adjacent to the terminal building. There was a Cessna Stationaire parked in the 3 spot and I insured the right wingtip cleared this aircraft, after which I directed my attention to the tie down ropes that were in parking spots 1 (planned parking spot) and 2. I had parked in this location many times with no incidents. While watching the direction of the aircraft between the ropes I noticed a pole out of the corner of my eye.. My main concern was to insure we did not taxi over the ropes and take a chance of having them entangled into the prop. I was maintaining what I thought was the normal taxi path taken previously and thought the wingtip would clear the pole. As I started to turn the aircraft into the parking spot my co-pilot yelled "STOP", but my reaction wss not quick enough and at that point the wingtip struck the pole. I was later informed the pole had just been installed in the last 45 days.
