

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Griffin State: Georgia

ZIP: 30223 Country: USA

Latitude: 33.2487 N (est'd.) Longitude: 084.4002 W (est'd.)

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 05/22/2016 Local Time: 3 p.m.
mm/dd/yyyy

Time Zone: EDT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N36SR

Manufacturer: Beechcraft

Model: A36

Serial Number: E-1096

Year of Manufacture: 1977

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 3600 lbs

Weight at Time of Accident/Incident: ~2976 lbs

Number of Seats: 6 Flight Crew Seats: 1

Cabin Crew Seats: _____ Passenger Seats: 5

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☐ Normal
- ☐ Aerobatic

☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left main tire demolished due to heavy braking and turning in final attempt to stop aircraft on pavement. Nose gear broken off when hit road pavement after rolling down soil embankment at end of airport property approximately 80 feet (as paced off) from end of runway pavement. One prop blade bent and right tip tank badly damaged when ran into embankment on opposite side of road where aircraft came to a halt, skin and structural damage forward of firewall.
No other property damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KFTW at approximately 1430Z (9:30 a.m. CDT) on an instrument flight plan to GA62. After Regional Approach radar vectors to the Hubbard 9 departure and after clearance to 7,000' MSL, asked and received direct destination. Canceled IFR with Atlanta (I think it was ATL Approach rather than Center) as GA62 has no instrument procedures, but also asked ATC to stay with me. No traffic was nearby. Descended to pattern altitude. Was listening to the 62A AWOS which was the nearest weather report. Finally spotted the airport just as passing it. Slowed, gear down, half flaps because of reported gusts, turned to final for 18, was not stopped nearing what appeared to be the half way point and went around. Made a second approach to 18, again with half flaps, had good airspeed over the boundary, was down and braking, but was unable to get stopped on the pavement and inertia carried me over the embankment, across the road, and stopped at the embankment of the other side of the road (Campground Road). Time was approximately 1900Z (3 p.m. EDT). Having some potential concern of fire, I immediately shutdown the plane (except the ELT) and opened the door. Persons from the airport had already arrived and one reached in to shut off the ELT and another reported it to ATC. As the plane was at an angle, one of the persons gave me a hand so I could step down easily. I assured everyone that I was fine and had no injury at all.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Knowledge of the elevation of the approach end of Runway 18 (which is 18L but is marked only as 18). Knowledge that the paved 40' width of the runway is part of an overall runway width of 150' of which the west width is the turf 18R. Knowledge that the closer trees in the 18 approach are significantly shorter than the ones to the north of them.

I was listening intently to the nearby 62A AWOS. Last I heard before the second approach was "winds variable 350 degrees to 060 at 9 gusting to 14." In retrospect, I also think I should have used full flaps (my normal practice). My concern had been wind gusts in combination with the narrow runway. While I'd read the FAA Master Record 5010-2 and read the information on airnav.com for GA62, it would have been good to have checked into Google Earth as well. Google Earth is not necessarily accurate in ground elevations which I've observed from using it professionally in my work, but it would have given me some guidance about how far to descend in the final approach in order to land as near the approach pavement end as possible. The elevations of the runway ends are not listed on any publications. The general word locally is that it is uphill to 36 leading one to think that the 36 end is the high point. On the morning of 5/25/2016 I walked the entire runway length and noted the the high point is north an estimated couple hundred feet from the south end and then the pavement levels off. I also observed that the north end is perhaps 50 to 60 feet lower than the high point.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

110 Gallons**Fuel Type**☐ 80/87☐ 115/145☐ Jet B☐ Other, specify _____☒ 100 Low Lead☐ Jet A☐ JP8☐ 100/130☐ Jet A-1☐ Automotive**Other Services, if Any, Prior to Departure****EVACUATION OF AIRCRAFT**Was an emergency evacuation of the aircraft performed? ☐ Yes ☒ No**Method of Exit** – Describe how the occupants exited and how many occupants evacuated each location

Only occupant was pilot who quickly shutdown all equipment except ELT, opened the door of the flight deck and exited normally with a hand assist as the aircraft was at a tilt. (Someone else that came on site by the time the door was opened then turned off the ELT and another person who had come on site called ATL approach and advised them of the aircraft that was emitting the ELT signal.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

The aircraft weight and balance documents are with the POH and the Aircraft Log, both of which are in the airplane in Georgia while I am at home in Texas filling out these documents. I was taking the plane for its annual inspection as the IA who did the last 16 annuals retired from doing annuals last year. I believe I've provided all correct information.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
