Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft had multiple prop strikes before flipping over on its back damaging the vertical stabilizer and rudder. The fuselage tubing was bent along with all lift struts being damaged. The top of the fuselage was pushed in when it went over on its back and the top wings received minor dents. The windshield broke, prop bent, spinner crushed, starter broke off it's mount, carburetor scoop tore off and engine cowl is deformed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Departed private airstrip (MN58) at 1530 lcl time with a destination being a private farm field north of Braham, Mn. I had never been to the destination. On approach to the field the winds were mostly calm with clear conditions. With main gear touchdown I applied brakes and the airplane immediately pitched forward on it's nose and flipped over. The combination of long grass and braking created a forward momentum that I could not recover from. The airplane traveled approximately 75 yards.
